Cancel Hiding Post-characters

Add Time As Prefix or Suffix

A. Scanning setting code "Add Time as Prefix", then there is scanning time in front of barcode data.

Add Time as Prefix

B. Scanning setting code "Add Time as Suffix", then there is scanning time behind barcode data.

Add Time as Suffix

C. If you do not need scanning time as prefix or suffix, you can scan following setting code "Cancel Setting".

Cancel Setting

Update Time

1st: Making scanner and computer connected via USB cable, and turning on the scanner.
 2nd: Finding "Update_Time_V1.1.exe" program in the computer and open it. As following picture show.

Scanner Set TFT Tool

UpdateTime

3rd: Click "Update Time"

Notes: "Update_time_V1.1.exe" program can be downloaded in website: <https://share.weiyun.com/508OXFZ>, or scanning following QR-code.

Screen Show Products Information Settings.

A. This scanner can store 2000 goods information (including goods' barcode data, goods' price and goods' specification)

B. This scanner only supports to store goods which barcode characters number within 13. If goods' barcode characters number beyond 13, scanner won't extract product information.

Step1: Creating a excel file, first line fill in goods' barcode data; second line fill in goods' specification; third line fill in goods' price.

	A	B	C
1	Barcode	Commodity Name	Price
2	9556089885201	Faber-Castell dust free eraser 1pc	1
3	9556939290124	DOL-S10 Staples 1pc	2
4	2112345678917	Paritene Shampoo 300ml	3

Step2: After filling all goods' information, saving excel table as text document format (separated by Tabs).

Step3: Making scanner and computer connected via USB cable, and turning on the scanner.

Step4: Finding "DataToolsV1.4.exe" in the computer and open it. As following picture show:

Step5: Clicking "Open" and choosing the Text files you just created, then clicking "Load file". Do not press the trigger and make sure scanner is got connected with computer via USB cable.

Step6: There is a status light in the DataTool program. It's yellow after you press the "Open". It will be turned to Green if loading file successfully, or Red if failed.

Notes: "DataToolsV1.1.exe" program can be downloaded in website: <https://share.weiyun.com/5080XFZ>, or scanning following QR-code.

FAQ (Frequently Asked Questions)

- ▶ What should I do if the scanner can not pair with my bluetooth device?
 - A. Making sure the scanner is in the pairing state under the required Bluetooth protocol
 - B. If the devices has connected successfully with other barcode scanner via bluetooth, or other devices, Please delete the bluetooth connection record before connecting
 - C. The wireless module has been damaged
- ▶ Why can not the scanner read some codes?
 - A. The scan engine does not support that code type or disabled default. You can contact with us to enable it.
- ▶ Why can not the scanner transfer data to my device when they are connected?
 - A. Please confirm if the scanner is under "Storage Mode", you need to turn it to "Normal Mode" or scanning setting code "Upload Data" to transfer data to your device.
 - B. The wireless module may has been damaged.
- ▶ Why does the data which show in my device is not the same as code?
 - A. Please confirm that if the keyboard language of the scanner is the same as your devices'.
- ▶ Why can not the scanner charge?
 - A. Please choose the correct charge head and charge cable.
 - B. Charging circuit or battery may has been damaged.
- ▶ How to make more settings?
 - Please contact with us for more settings.

Buzzer Performance	Introduction
